CRIATIVO GLOBAL NEWSLETTER

Building the Skills Students Need for a Changing World

A Criativo Perspective: In "Go Fail," Criativo Chairman Krishna Nallamilli asks whether education should give students more chances to explore before making high-stakes choices. Small experiments and recoverable mistakes help learners discover what works, reflect on setbacks and make better decisions next time—a practical foundation for resilience and adaptability.

GCC: Education Ministers Call for More Future-Ready Systems

At their September meeting in Bahrain, GCC education ministers discussed closer coordination and the exchange of expertise across the region. The UAE's education minister said stronger cooperation can support more flexible, future-ready systems. Shared learning across countries could help keep adaptability and collaboration in focus as education priorities evolve

EDUCATION IN ACTION: SKILLS FOR A CHANGING WORLD

India: Students Practice Critical Thinking at Scale

A Times of India report on the 2026 Critical Thinking Championship describes students working on skills such as distinguishing fact from opinion, testing assumptions and evaluating arguments. More than one million students from 24,706 schools took part, highlighting how critical thinking can be practiced alongside academic learning

UAE: Schools Emphasise Support and Resilience Around Assessments

Ahead of students' return from the October break, UAE school leaders advised families to restore routines, keep revision manageable and listen to children's concerns about assessments. The advice highlights how confidence and resilience can grow when students are supported through academic pressure, rather than pushed to simply perform.

Qatar: Educators Share Approaches to Student-Centred Learning

Qatar's October Teaching and Learning Forum brought 1,974 educators together for 28 workshops on teaching practices, assessment, technology and student engagement. The coverage highlights how educators exchanged ideas and explored ways to respond to students' needs—an example of collaboration and adaptability shaping the learning environment.

FROM CLASSROOM PRACTICE TO FUTURE-READY SKILLS

UAE: PIRLS 2026 Puts Reading Comprehension in Focus

The PIRLS 2026 reading assessment began in UAE schools on October 19 for selected Grade 4 students and runs through November 12. It looks beyond recalling information to skills like drawing conclusions, interpreting ideas, connecting evidence and evaluating content—foundational literacy skills closely tied to critical thinking and problem-solving.

What the Research Says: Learning for a Changing World

UNICEF's September 2026 Education Strategy responds to rapid technological, social and environmental change with a focus on meaningful learning, equity and skills development. It raises a practical question for schools: do students regularly get to solve open-ended problems, exchange ideas, create and reflect? These experiences can make adaptability and resilience part of everyday learning.

Closing Note

Future-ready learning does not ask schools to set academic knowledge aside. It asks them to **help students apply that knowledge:** investigate questions, design solutions, collaborate across perspectives and learn from unsuccessful attempts. When classrooms make space for this practice, students can become better prepared to navigate change with confidence and care.
