The Evolution of Global Learning: Navigating Policy and Progress

The July 2026 edition focuses on **global education policy, equity, and technology integration**, highlighting recent initiatives from the **UAE, India, the UN, and UNESCO** that underscore the necessity of building resilient education systems. Ultimately, these developments indicate that long-term student success will increasingly depend on adaptability, strategic policy, data-driven tracking of learning gaps, and AI integration.

Addressing Global Learning Losses in Crisis Contexts

A **UN-backed report** warns that global crises are **disrupting education for 258 million children**, stressing the urgent need for sustained, inclusive policies to prevent early learning gaps and safeguard their future opportunities.

Monitoring Access, Equity, and Sustained Change

UNESCO's 2026 report highlights 25 years of educational progress, arguing that **lasting change requires a long-term commitment** to equity and aligned domestic policies rather than isolated best practices.

BUILDING BETTER SYSTEMS

UAE: Streamlining Academic Transitions with Digital Strategies

The UAE's digital rollout of end-of-year exam results via an electronic portal **ensures seamless transitions for students across all grades**, facilitating official certificate printing and removing any need for physical branch visits.

EMPOWERING LEARNERS & EDUCATORS

Standardising Teacher Education Admissions

To maintain high standards in educator training, the **National Council for Teacher Education (NCTE)** issued a strict advisory regarding the four-year Integrated Teacher Education Programme (ITEP). For the 2026/2027 academic session, all participating institutions **must conduct admissions exclusively based on the National Common Entrance Test (NCET)** results declared in early June, ensuring a fair, transparent, and standardized process for the next generation of teachers.

Bridging Theory and Practice: The Science of Interview Readiness

As interviews increasingly assess communication, critical thinking, and confidence alongside academic knowledge, students need opportunities to practise in realistic settings. To support this, **Criativo is preparing to introduce an AI-powered interview readiness platform** that uses evidence-based learning principles to help students **build confidence through realistic practice and personalised feedback**.

Closing Note

Resilient educational frameworks depend on continuous, data-informed evolution. Whether optimizing operations through digital portals or closing global learning gaps, **success relies on purpose and sustainability**. As shifting policies and technologies like AI reshape curricula, this mid-summer transition offers education leaders a prime opportunity to align local practices with global equity standards, building adaptable systems that effectively prepare future generations.
