Beyond the Hype: Real Applications of AI in Education

Issue 003

06 October, 2025/Vol. 003

AI IN CLASSROOMS, FRIEND OR FOE?

Generative AI is no longer a novelty, it's becoming part of classroom routines, policy frameworks, and teacher workflows. This issue cuts through the noise to show **where AI is genuinely helping (not replacing) teachers, and how leading systems are governing AI responsibly.**

WHERE AI IS HELPING, NOT REPLACING, TEACHERS

Singapore is rolling out an **Authoring Copilot** that helps teachers plan lessons, group students by competency, and get real-time progress insights, teachers keep control, AI does the prep work. [Corporate NTU](#)

New Zealand's qualifications authority used **Automated Text Scoring** to return results **3.5 weeks earlier**, while keeping humans in the loop for quality assurance. [NZQA](#)

The UK is actively piloting AI for **report-writing, writing analysis and even technical skill assessment** with a sharp focus on **time saved for teachers**. [The Guardian](#)

THE 5 WAYS AI CAN REVOLUTIONIZE LEARNING

written by Criativo Chairman, Krishna Nallamilli

ON-DEMAND TUTORING & CATCH UP SUPPORT

Khanmigo (Khan Academy's AI tutor/coach) has grown from **68k student/teacher** users in 2023–24 to **700k+** in 2024–2025 across **380+ districts**, used to scaffold explanations and practice, **teachers remain the orchestrators**. [Education Week](#)

District pilots (e.g., **Newark**) report momentum to expand AI tutoring after early trials to address learning gaps. [Chalkbeat+1](#)

TEACHERS PD & WORKLOAD RELIEF

In the UK, official guidance confirms teachers can use AI for planning, resources, marking and feedback with **professional judgement and verification**. [Education Hub](#)

RAND finds rising teacher training on AI and steady growth in classroom use, evidence that AI is becoming a practical **co-pilot**, not a replacement. [RAND Corporation+1](#)

Why it matters: The best deployments make **teachers more effective**, speed up feedback cycles, and personalize practice, while keeping pedagogy, ethics and assessment integrity under human control. (See UNESCO's **human-centred guidance**.) [UNESCO+1](#)

HOW TOP SYSTEMS ARE REGULATING OR IMPLEMENTING AI TOOLS

Issue 003

06 October, 2025/Vol. 003

UNITED ARAB EMIRATES (UAE)

AI becomes a formal K–12 subject from 2025 to 2026, with up to **20 hours** a year on ethics, prompting and evaluating AI outputs; **teacher training is underway**. [Financial Times+2ETEducation.com+2](#)

SAUDI ARABIA

Launching a **nationwide AI curriculum** in 2025 to 2026 for **6 million** students, aligned with **Vision 2030**; agencies are releasing classroom materials for safe, practical use. [Saudi Press Agency+2The Times of India+2](#)

DID YOU KNOW?

- **92% of UK university students** report using gen-AI; universities are stress-testing assessments accordingly. [The Guardian](#)
- **47% of US teachers** had received some AI training by fall 2024 (and rising). [RAND Corporation](#)
- **Teachers say AI can save hours weekly** on routine tasks, when governed and verified. [The Guardian+1](#)

AUSTRALIA

Education Ministers **endorsed the national AI-in-Schools Framework review (June 2025)** to move from bans to **governed, equitable rollouts** across states. [Department of Education+1](#)

INTERNATIONAL BACCALAUREATE (IB)

Not banning AI; instead, updated **Academic Integrity policy** provides explicit **AI use guidance, sample TOK** activities, and ethical practice expectations. [International Baccalaureate@+1](#)

NEW YORK CITY (USA)

Reversed a previous ChatGPT ban and moved to **policy and pilots** to guide “smart use” in teaching/learning. [Education Week+1](#)

Why it matters: Policy clarity (what’s allowed, when, and how) reduces staff hesitation, focuses vendors on privacy & safety, and keeps **teachers in the driver’s seat**. See OECD’s 2025 guidance on how curricula may evolve in an AI era. [OECD+1](#)
