EdTech That Sticks: What Schools Will Actually Adopt in 2026

In this **January** edition, we explore **one question** every school leader is asking:

How do we choose EdTech that teachers will actually use, and that truly improves learning?

From evidence-based decision-making to readiness and integration, we highlight what separates “another tool” from **real, measurable impact**. (And we showcase **DigiVal** as one example of outcome-led EdTech in action.)

Evidence Before Excitement

EdTech moves fast, **UNESCO** notes products change about **every 36 months**, so schools need a quick “evidence check” before investing.

The Readiness Reality Check

Adoption depends on the basics: **buy-in, budget, infrastructure, and capacity**, the same enabling factors highlighted in the World Bank’s ETRI framework.

WHAT MAKES EDTECH WORK IN REAL SCHOOLS?

From Pilot to Scale: A Simple 90-Day Rollout Plan

Start small, train in real classroom routines, and **review usage weekly**, if it's not used, impact won't follow.

Integration Over "One More Login"

Standards like **LTI** make it **easier** and more **secure** to connect tools to a school platform, **reducing friction** for teachers and students.

Measure What Matters

EdTech should earn its place with **clear indicators**, like **time saved** for teachers, **consistent reporting**, **student participation**, and **progress trends**. Evidence reviews also flag that effectiveness can vary by context, and implementation quality matters.

TURNING EDTECH INTO REAL IMPACT

DigiVal Spotlight: Fairer, Faster Exam Evaluation

DigiVal supports schools by enabling:

- **Standardised marking** with rubrics and structured workflows
- **Faster evaluation cycles** with clear tracking and ownership
- **Audit-friendly** moderation and quality checks
- **Insights** at paper/question/cohort level for academic teams

Did You Know?

UNESCO also highlights that many schools adopt tools **without strong evidence checks**, making implementation quality the real differentiator.

Closing Note

EdTech is not the goal, **better learning** and **stronger school operations** are.

This year, **Criativo** is committed to spotlighting practical, evidence-aware choices that help schools adopt technology with clarity, confidence, and measurable value.
