FROM CHALKBOARDS TO ECOSYSTEMS

Issue 002

05 September, 2025/Vol. 002

Education is Entering a New Era

In this issue, we examine how global shifts, from **AI-driven classrooms** to **learner-centered models**, are transforming the way knowledge is delivered. We also highlight the growing role of **homeschooling in the UAE** and share how **Criativo is shaping next-generation learning centers** across the GCC.

Will Machine Learning Replace the Traditional Classroom?

written by Criativo Chairman, Krishna Nallamilli

Criativo's Work on Learning Centers

Criativo has been at the forefront of this transformation, working to design **next-generation learning centers across the GCC**. These centers are not only hubs for academic instruction but also **spaces for innovation, creativity, and personal growth**.

Want to know more?

Why it matters: With **40+ years of expertise in Education & Learning**, Criativo is shaping the infrastructure that supports tomorrow's learner-centric ecosystems.

Traditional Schooling vs. Learning Center Models

For decades, traditional schooling has been built around fixed schedules, standardized content, and a one-size-fits-all structure.

But a wave of innovative models is now rewriting that script:

AI-Powered "Alpha School": Backed by Bill Ackman.

Why it matters: These models illustrate how education is shifting towards choice, flexibility, and individual focus, key pillars of the learning center model.

From Curriculum Delivery to Learner-Centric Ecosystems

Education is evolving globally, from rote memorization to systems that emphasize adaptability, relevance, and agency.

HOMESCHOOLING IN THE UAE: GROWING INTEREST

Issue 002

05 September, 2025/Vol. 002

Homeschooling is becoming an **increasingly viable** option for **families in the UAE**. According to recent surveys, nearly half of Dubai parents still prefer online or hybrid learning models.

Why it matters: Homeschooling complements the rise of learning centers, giving families more choice in tailoring education to their children's needs.

Why Parents Opt to Homeschool Their Children?

GCC's school-building sprint:

Over 2,800 new schools are needed by 2029 to serve 15.5 million students.

UAE's AI leap:

From KG to Grade 12, UAE public schools will start teaching AI as a formal subject in 2025–26, covering everything from practical applications to ethics.

Nearly 3,000 CBSE School Principals Keep Learning Alive Together:

Since 1988, the CBSE Gulf Sahodaya, a network of 193 CBSE-affiliated schools across the GCC, has been sharing exams, cultural events, and leadership strategies year after year, fostering community, collaboration, and consistency.
